 A MAGNETIC METHOD OF WATER TREATMENT
 (Magnitnyy Spособ Vodoobrabotki). Feb 61 [4]p.
 1 ref. RTS 1647.
 Order from LC or SLA mi\$1.80, ph\$1.80 61-15920

Trans. of Masloboyro-Zhirovaya Promyshlennost'
 (USSR) 1959, v. 25, no. 9, p. 41-43.

A magnetic device for production of reagentless water for boilers and steam turbines used in the fats industry is described. The carbonate and permanent hardness salts dissolved in the water for one or two days lose their ability to form deposits after the water has been passed through a magnetic field. Instead of scale, an amorphous sludge is formed in the heat exchange equipment; this sludge is easily removed by blowdown devices.
